SKILLS

I have knowledge of python, javascript,jquery,Flask,Django..Now I am learning NodeJs with mongodb as a database and I have also learn mysql.

PROJECTS

RestAPI:-
In this project I have used swagger module for designing api.basically this project is based on REST.I used rest operation with user.in which i have used Hapi as a framework of node and mongoose for database.

https://github.com/shivam8800/RestApi

AsanaAPI:-
I have build a api in NodeJs with mysql as a database.this project is based on ASANA.the main thing in this project is assigning task to others other for this I have make a collaborator table with references of 2 tables one is user table and other is task table.

https://github.com/shivam8800/asana-project-API

SendingMail:-
I have build a app in which one user can mail to other user.If one user delete their sending mail then the mail of other user does not delete.it all about database.I have done all this things in Django

https://github.com/shivam8800/Sendingemails_as_google

UsingAPI:-
In this app I have create website which show woman literacy rate from bar graph.in which i have used GOV api and show data in chart by using chart.js and show data in chart by using chart.js.

https://github.com/shivam8800/api_integration_using_chart.js

PlaceVisitingAPI:-
In which I have made a Full Flash custom API and database I have used is MongoDB.

https://github.com/shivam8800/visitingAppApi

Blogpost_Platform:-
Here I have build a platform in which login user can post a blog,delete a post and also edit it.
I have done these CRUD operation in DJANGO.
